# creation!

## the genesis

During the late 80's and early 90's a new style of music overtook the world. At the same time a New York teenager was experimenting with electronic sounds.

His name is **Joey Beltram**

and he is now recognised as the world's most talented and influential techno producer.

Proudly presented by Creation in an exclusive '91 set including such timeless classics as Energy Flash, My Sound, Mentasm and Machines.

2 years ago tapes began appearing around Adelaide playing a style of music never before heard.

The dj was Magoo and the mc was Mad P and together they form

This new sound was Jungle Techno, their word, and its message has finally reached our shores.

Creation presents the UK's finest rave act playing a selection of the tunes that made them famous.
